SOFTWARE DEVELOPER

Adaptable Software Developer with a strong foundation in modern web development and a passion for building intuitive, user-focused applications. Thrives in collaborative environments, enjoys solving complex problems, and is eager to contribute, learn, and grow alongside an experienced engineering team. Combines a background in design, sales, and client communication with technical expertise to create thoughtful, impactful software. Certified in in-home design projects and experienced in delivering tailored solutions that enhanced client satisfaction and drove revenue. Strong multitasker with a keen eye for aesthetics, translating design principles into interactive, user-friendly web experiences that combine creativity with technical precision.

TECHNICAL SKILLS

HTML - CSS - JavaScript - React - Git & Github - Node - Express - MongoDB - Responsive - API - Design - [Three.js](#) - Blender - UX

PROJECTS

ORB.0 | Frontend | [Live](#)

Tech: HTML, CSS, JavaScript, GitHub Pages

An interactive, design-focused webpage exploring creative layouts and visual storytelling.

Built from scratch with semantic HTML, custom CSS, and vanilla JavaScript

- Implemented responsive design principles to ensure compatibility across devices
- Showcased ability to blend technical coding with artistic concepts, reinforcing a strong design background
- Deployed and maintained the project on GitHub Pages for live hosting and version control

Numfluers | Front-End | [Live](#)

Tech: React, JavaScript, CSS, HTML, Vite, GitHub Pages

Developed an interactive web application featuring custom animations, responsive layouts, and modern UI design principles.

- Built reusable React components and implemented dynamic state management to create a smooth user experience.
- Deployed the application through GitHub Pages with a streamlined front-end workflow and version control practices.

Osprey Visuals | Fullstack Developer & Designer | [Live](#)

Tech: React, JavaScript, CSS, Vite, GitHub Pages, API

Designed and developed a custom business website to generate more revenue

Implemented interactive animations, scroll based effects, and responsive layouts to create a polished user experience across devices

Emphasis on call to action buttons to streamline client leads

- Mobile Responsiveness and ease of use
- Optimized photos and files to minimize loading time for user experience
- Connected to a custom domain and email API for consistency and alerting of new potential customers

RPS | JavaScript | [Live](#)

Tech: HTML, CSS, JavaScript, GitHub Pages

An interactive game design with responsiveness for mobile usage and user experience in mind

- Engineered UI feedback loops to display win/lose/tie outcomes dynamically (e.g., updating scores, showing result messages)
- Organized code into modular, maintainable structure (separate CSS for styling, JS for logic, HTML for structure) to support readability and future extension

WORK EXPERIENCE

TripleTen (Remote)

Software Engineering Apprentice | Spring 2025 – Present

- Completed an intensive full-stack software engineering apprenticeship focused on modern web development, computer science fundamentals, and real-world software engineering practices.
- Built and deployed multiple production-ready web applications from concept to live deployment using HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, Git, and REST APIs.
- Developed responsive, accessible frontend interfaces while implementing reusable components, state management, and modern UI/UX principles.
- Designed and implemented backend services, RESTful APIs, authentication workflows, database schemas, and CRUD operations.
- Collaborated using Git and GitHub through feature branching, version control, pull requests, and iterative code reviews.
- Applied debugging techniques, browser developer tools, API testing, and performance optimization to diagnose and resolve application issues.
- Learned software engineering best practices including object-oriented programming concepts, responsive design, testing methodologies, and Agile-inspired development workflows.
- Strengthened problem-solving skills by completing hundreds of programming exercises, technical challenges, and progressively complex development projects throughout the program.

Suncoast Florist – Sarasota, FL

Floral Designer & Sales Associate | 2025 – Present

- Design and assemble custom floral arrangements while monitoring material costs to ensure profitability and maintain healthy margins.
- Coordinate and schedule floral services for weddings and special events, supporting business operations and client satisfaction.
- Manage and expedite delivery orders to meet time-sensitive deadlines.
- Consolidate inventory and implement loss-prevention strategies, reducing waste and maximizing product value.
- Provide attentive customer service, translating client needs into creative, high-quality designs.

Hudson's Furniture and Mattress Gallery – Bradenton, FL

Sales & Design Consultant | Sept 2023 – Feb 2025

- Certified in in-home design projects, successfully completing whole-home layouts that drove thousands in sales.
- Built client relationships through negotiation, conflict resolution, and proactive communication in a high-pressure retail environment.
- Collaborated with designers and team members to deliver tailored, high-value solutions aligned with customer needs.
- Managed sensitive information, large transactions, and CRM software for lead generation and client tracking.

EDUCATION

TripleTen -Online

Software Engineer Trainee | Spring 2025 - Jan 2026

Monroe Community College-

Fine Arts Program | Brighton, NY 2018 -Dean's list fall semester
